

## **Assessment of Lepidoptera pollinator species diversity data in East Africa: Project Biodiversity Data Activities: June 2020**

The project has progressed in the publication of **21,575** Lepidoptera species occurrence data in GBIF. To date the status of published species occurrence data is follows:

Family Papilionoidae (Swallowtail butterflies) 7,345 records: Link <https://www.gbif.org/dataset/3008196f-5ffc-496d-b11d-57f2124ee06b>

Family Sphingidae (Hawkmoths) 4,943 records: Link <https://www.gbif.org/dataset/302155f9-49a6-4ee2-a01b-293067ddee0d/project>.

Family Hesperidae (Skippers) 8,848 records: Link: <https://www.gbif.org/dataset/507c5b51-1f83-4c7f-9111-94fb255adfd7>

Lycaenidae 439 records: Link: <https://www.gbif.org/dataset/ebe7091d-8787-420e-871f-cb945e3b5d47>

Additionally, a data paper on the Swallowtail butterflies in the Biodiversity Data Journal in April 2020; Link: <https://bdj.pensoft.net/article/50664/>

### **Acknowledgement**

We acknowledge the support from the JRS Biodiversity Foundation and the NMK management for facilitating the project staff to undertake this work. The NMK IPT manager and the NMK bioinformatics officer are appreciated for the support given in this project activity.
